

2500 Chamfered Series

deceuninck

The 2500 Chamfered series represents state-of-the-art in window and door design, embracing modern styles and high quality engineering standards. The Chamfered contours integrate easily in all types of architecture and design with a range of colours and finishes that ensure you can find the perfect window for your home.

Chamfered Bead

The 2500 Chamfered is a revolutionary system from one of the world's leading producers of PVC-U profile systems. Years of research and development have resulted in a window and door system that is both technically advanced with high performance, to improve the comfort of your home. ■

Retro Bead

The beautiful Chamfered shape adds a stylish elegance to both windows and door, inside and out. The 2500 chamfered also takes advantage of the Deceuninck revolutionary new weatherseal, which is a significant step forward in weather proofing technology. ■

To give your windows a more natural look, you can take advantage of the beautiful woodgrain effect finishes. You can change the look of your home even further by adding a splash of colour with the unique and durable Decoroc surface coating system, available in a wide range of colours. ■

Simplicity

- fully compatible with all standard hardware
- clip-fit detail ensures positive fixing of accessories

Inspired Design

- symmetrical profile concept gives balanced aesthetics
- unique modern shape complements classical and contemporary

Architecture

- personalisation with glazing bead and sash options
- white colour RAL 9016
- a range of the most popular colours is available from stock
- Decoroc colours and other foils on request

2500 Chamfered Series

Weather performance

The 2500 Chamfered multi-functional weatherseal is at the cutting edge of modern design and material technology. Manufactured from high performance thermoplastic elastomers, the unique design and incorporated features ensure unrivalled weather performance.

The new weatherseal is welded at the corners, providing an all-round seal, further improving the insulating properties of the product.

This ingenious design enables a significant reduction in the everyday strain placed on the hardware, which in turn increases the lifespan of the window.

2500 Chamfered windows and doors have been tested to and achieved the following certification:

- BS 7412 Specification for PVC-U windows and doors
- BS 6375 Weather performance, operation and strength characteristics for windows and doors.

In accordance with the requirements of:

- BS EN 14351-1 Windows and doors product standard

Security

The 2500 Chamfered window and door system is fully compatible with all standard security hardware and also features several unique elements within its design to further enhance its security capabilities.

2500 Chamfered windows and doors have been tested to and achieved the following security certification:

- BS 7950 Enhanced security performance; windows
- PAS 24 Enhanced security performance; doors

Insulation

The 2500 Chamfered window and door system exceeds all requirements of Approved Document Part L of the Building Regulations and has been assessed by approved simulator to EN 10077-1 and EN 10077-2.

Building a sustainable home

At Deceuninck, our commitment towards innovation, ecology and design provides us with a clear focus; building a sustainable home. A home that is more energy-efficient to live in and more attractive to look at. Deceuninck works worldwide with state-of-the-art materials, resulting in low maintenance, top insulating and long lasting products that can be fully recycled at end of life. Moreover, our values help us build a better world for our partners and end users. Deceuninck sets the first step by building a sustainable home.
